

MAY STATEWIDE MEETING: QUESTION/ANSWER

If offender is unknown but we know it was for example a male. Can you touch on how this information is used?

If portions of the offender's demographics are known, the Offender Sequence Number would be 01, then enter the known demographics.

What about range (for offenders)? We know the individual falls between 40-45 years?

The offender sequence number would be 01, and then an age range can be entered if the exact date of birth is not known.

Is the UCR Training offered at the ILEA Academy?

At this time, no. The UCR Team is working on building an e-Learning to assist officers with crime reporting basics. ILEA will then publish the training created by the UCR team so more agencies can be reached.
